

MD. JUBAYER AFRIDY

Application Security Engineer | Full stack developer

📞 01930-827847 ✉️ jubayerafridy32@gmail.com 🔗 <https://www.linkedin.com/in/jubayer-afridy/> 📍 Dhaka

SUMMARY

Application Security Engineer and Full-Stack Developer with experience building high-performance web applications and securing them against critical vulnerabilities. Proficient in React/Next.js, Node.js, and modern security testing methodologies (SAST/DAST). Adept at bridge-building between development teams and security operations by conducting secure code reviews, penetration testing, and architectural hardening.

SKILLS

Frontend

React.js Next.js TypeScript JavaScript ES6 HTML5 CSS3 Tailwind CSS Redux Toolkit

Backend

Node.js Express.js PostgreSQL MongoDB Prisma ORM REST APIs WebSocket JWT Authentication OAuth

Docker

Security

1. Vulnerability Assessment & Penetration Testing (OWASP Top 10).
2. XSS, SQL, Command Injection Detection, Mitigation & Prevention.
3. Authentication & Authorization Security (RBAC, IDOR, Session, JWT, OAuth).
4. API Security Testing (REST APIs, WebSocket, Rate Limiting) .
5. Secure File Upload Validation & Hardening.
6. CSRF & SSRF Assessment & Mitigation.
7. Business Logic Vulnerability Assessment.
8. Race Condition Identification & Remediation.
9. Cross-Origin Resource Sharing CORS Security.
10. Secure Coding & Vulnerability Remediation.
11. SAST (Semgrep, SonarQube) & DAST (Burp Suite, OWASP ZAP) .
12. Git & GitHub.
13. Kali Linux.

PROJECTS & EXPERIENCE

Founder & Developer – [CryptoAnalysis.io](#)

Real-Time Cryptocurrency Analysis Platform

- Technologies: Next.js, Node.js, PostgreSQL, WebSockets
- Developed real-time technical analysis modules including EMA, RSI, Volatility, Support, and Resistance indicators
- Processed and visualized live market data with low-latency updates
- Implemented security controls including rate limiting, secure API design, and access control mechanisms

Security Analyst – [Kaporwaali.com](#)

Security Assessment & Remediation

- Performed Application security assessment of an e-commerce platform and identified multiple application-layer vulnerabilities
- Remediated authentication and authorization weaknesses in JWT-based authentication flows
- Identified and fixed SQL Injection risks through secure query handling and validation
- Resolved a race condition vulnerability affecting product pricing and purchase workflows
- Improved application security posture through vulnerability remediation, secure coding practices, and security hardening

EDUCATION

Bachelor of Science (BSc) in Mathematics

[Dhaka College](#) [Affiliated with University of Dhaka](#)

📅 2019 - 2024 📍 Dhaka, Bangladesh
